

Physical Test Lab Technologist

You:

- Would rather work for "David" rather than a "Goliath"?
- Enjoy feeling that your work has a direct impact on the company you work for?
- Enjoy variety in your tasks?
- Have a good analytical mind?
- Prefer multitasking instead of working on one project at a time?
- Are looking for a full time job, during the day, Monday through Friday with a competitive salary?

We:

- Are proud of our values: Responsibility, Efficiency, Conviviality, and Learning.
- Are focused on our vision: Physical testing gives our society a sense of confidence, safety and reliability.
- Are more interested in your intelligence, creativity and your abilities than your long term experience.
- Believe in people and teamwork; "Alone we go faster, together we go further".
- We are an industrial test lab located in Dorval. Our core business is to simulate real life for manufacturers under controlled, yet accelerated test conditions. We provide the answers, and also the confidence in their products that they need to move forward.

You:

- Have a College Diploma in Applied or Life Sciences.
- Are passionate about Physical/Mechanical testing.
- Are hopefully familiar with ISO 17025 or any other quality control system (optional).
- Are very familiar with the Office Suite and can write test reports in both official languages.
