

Notice of CGSB Standards Withdrawal

Re: The withdrawal of Selected Canadian Furniture Standards by Canadian General Standards Board (CGSB):

CAN/CGSB 44.227-2017	Free-standing office desk/table, storage products and components (Withdrawn)
CAN/CGSB 44.229-2017	Interconnecting panel systems and supported components (Withdrawn)
CAN/CGSB 44.232-2018	Chairs for office environment (To be withdrawn 2023)

Although CGSB has officially removed current and future standards, the Government of Canada will maintain the requirements for all RFSO's, RFSA's and will be referenced in Annex A of the **Technical Product Specifications** for both Workspaces and Office Seating. The requirements within these standards are still relevant and will require suppliers to maintain their compliance until further notification.

Canada intends to review all test standards contained in these bulletins, including the compliance requirements for future planned improvements in the **Technical Product Specifications** that will include internal and external consultations with stake-holders to ensure the standards are updated to meet the Government of Canada's performance requirements.

Any questions related to these CGSB Standards should be directed to the Furniture National Center of Expertise (NCOE), Accommodation Management and Workplace Solution (AMWS).
